

icerik.com Test Project

You are going to create a single page of icerik.com content detail with HTML/Javascript or any JavaScript framework preferably VueJS.

Expectations

- Design a page like screenshot below

- Use our test API to get data and fill the page
- When user clicks “ONAYLA” button, a pop-up shows up with 5 stars. User can rate content with selecting stars and send request to /approvecontent endpoint. ([example](#))
- When user clicks “REVİZE VER” button, a pop-up shows up with a textarea which represents message for revision. You will send revision message to /revisioncontent endpoint.
- Page should be responsive.

You can find more details about API in [api-doc.html](#). You need a valid api key in order to send request. So we created a special api key for you.

Api-Key: NcCaHwHfus5pXDcJIZT73bq53MKC9AGw4DUjCwdW51hXISIDxNDB38B4QZuOnoCA
